

StyroMAX[®]

UNIVERSAL 14 inch ELECTRIC FAN

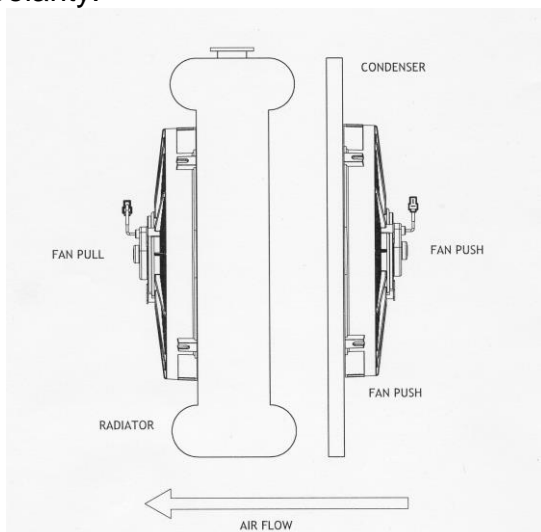

**Model Numbers
FA0070, and FA0071.**

BENEFITS

- Quiet operation
- Universal push or pull application
- Fingerguard for safety
- Extreme durability
- Lightweight
- Compact design

INTRODUCTION

StyroMAX's universal electric fans have been specifically designed for push or pull application. The slim construction allows for mounting in extremely confined positions, the unique fan blade design assures quiet operation. Air flow direction can be easily changed simply by reversing the fan blade and motor polarity.

CONSTRUCTION

The fan and shroud are manufactured from high quality 30% glass filled nylon 6 assuring peak performance under extreme heat conditions. The high quality 120W DC motor ensures reliability and a long service life.

APPLICATION

Condenser electric cooling fans are used to maximise the working life of mobile air conditioning systems by reducing damaging high working pressures and to maintain peak performance at all times. StyroMAX's electric fans can be mounted either directly to the A/C condenser or by separate mounting brackets.

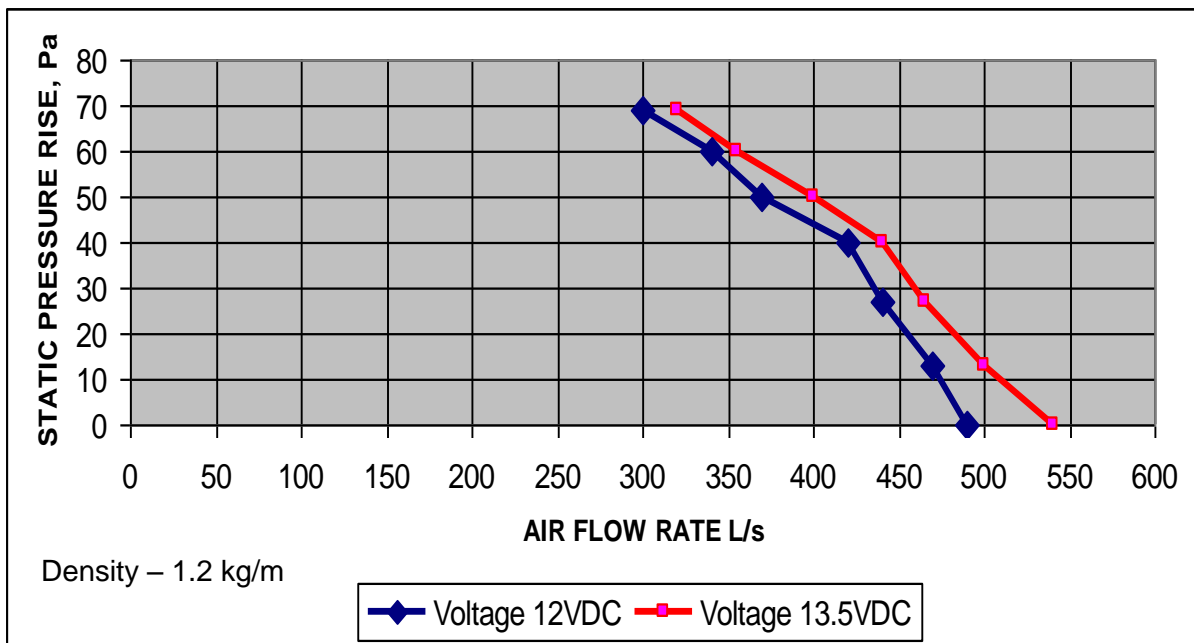

A NEW STANDARD OF QUALITY TO MEET TODAY'S HIGH STANDARDS

UNIVERSAL 14 inch ELECTRIC FAN
