

TEROSON®

TEROSON® SB 450

Designed for the cleaning of difficult to bond surfaces.

TEROSON® SB 450 is a specialised alcohol-based solution designed for the cleaning, preparation and priming of difficult to bond surfaces. It contains active ingredients that improve the adhesion of elastic adhesives and sealants on surfaces on which adhesion is usually difficult to achieve.

Application Areas:

TEROSON® SB 450 is used for the cleaning and, if necessary, improving the adhesion of elastic adhesives and sealants on metals, plastics and coated surfaces.

Application Steps:

1. Apply a thin and even layer of TEROSON® SB 450 using a suitable clean cloth or lint free paper towel.
2. Continue wiping the surface while the cloth is still wet to remove all heavy contamination. If necessary, repeat cleaning process with a fresh clean cloth.
3. The cloth or paper should be changed after each use to prevent contaminating the material in the bottle.
4. Allow TEROSON® SB 450 to fully evaporate from parts prior to bonding to avoid solvent entrapment within the bond joint.
5. Apply the Henkel adhesive after drying and assemble your parts.
6. In order to ensure the TEROSON® SB 450 has covered the entire substrate, the product contains a UV dye which is visible using a UV torch or lamp.
7. Close the container tightly after each use to prevent the ambient humidity from affecting the product. With exposure to water/humidity TEROSON® SB 450 loses its activity and becomes cloudy.

Cleaning:

Splashes should be removed at once using an absorbent material

Henkel

Key feature:

- Improves the adhesion of elastic adhesives and sealants on surfaces on which adhesion can be difficult to achieve. i.e: non-porous substrates like metals, plastics and coated surfaces.

Benefits:

- High cleaning properties
- Improves adhesion on difficult-to-bond surfaces
- Simple process with one step cleaning and priming

Technology	Cleaner & Primer
Chemical Type	Alcoholic solution
Components	One-component
Application	Surface Treatment
Appearance	Colourless, Clear Liquid
